

Savant Agentic Analytics

Empower your business analysts to transform data, and automate manual processes with a modern platform built for ease, speed, and complete governance.

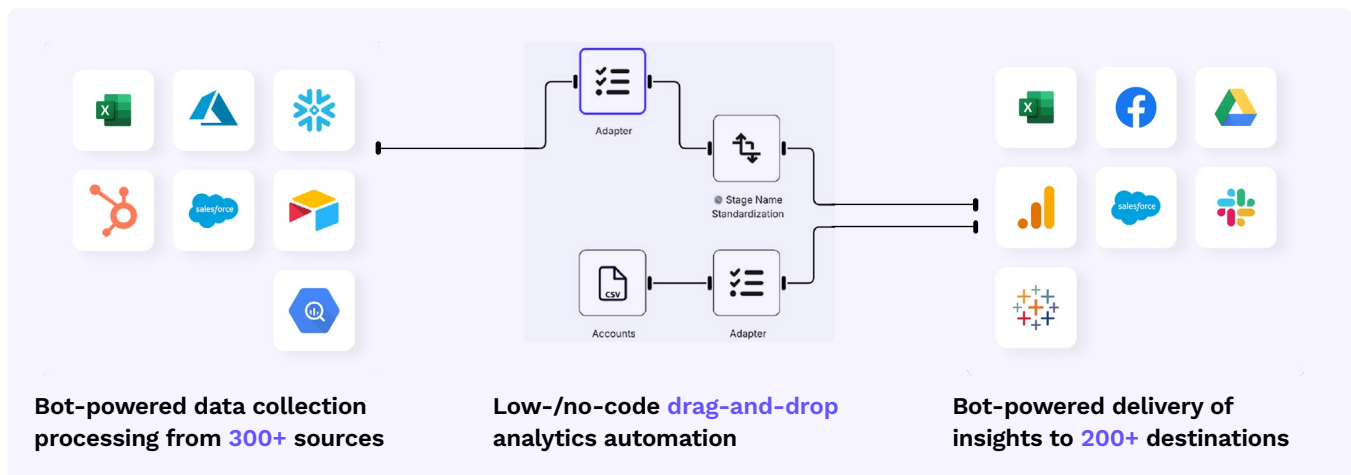

A native Gen AI- and cloud-first solution, Savant's analytics automation platform automates simple to complex data flows, integrates across 500+ data sources and destinations, and reduces dependencies on IT or data engineering teams. The result? Faster decision-making, proven cost-efficiencies, and controlled data and analytics governance at scale.

Key Benefits

- ◆ **Significant Cost-Efficiencies:** Reduce time spent on manual spreadsheets, data integrations, or costly first-generation legacy self-service platforms
- ◆ **Complete Data Governance:** Reduce risk of rogue use of tools, data or unforeseen spreadsheets stored on laptops; Savant ensures total data governance for power with control
- ◆ **Comprehensive Data Management:** Clean, prep, blend, report, and analyze data within one easy-to-use platform
- ◆ **Immediate Time to Value & Increased ROI:** 500+ connectors integrate with CRM, ERP, BI, and visualization apps for instant time to value and return on existing investments
- ◆ **Instantaneous Insights, Faster Decisions:** Drag-and-drop agentic AI workflows let analysts focus on problem-solving, not on formulas or programming

Speeding Outcomes With Drag-and-Drop Automation

Key Features of Savant's Agentic Analytics Platform

Automated Data Processing, Management and Reporting

- AI-powered data ingestion and transformation
- Automated data cleansing, prep, and enrichment
- Real-time data monitoring and anomaly detection
- Report Builder auto-generates Excel and PDF reports

Security and Compliance

- End-to-end encryption and PII hashing
- Leverage SSAO, SAML, SOC2, role-based access controls
- Compliance with GDPR, HIPAA, and industry regulations
- Leverage private cloud and VPC deployment options

Automated Reporting and Alerts

- Schedule workflows and reporting out-of-the-box with time zone support
- Real-time alerts for key business metrics
- AI-generated insights for proactive decision-making

Intuitive UI With No-Code Workflows

- Drag-and-drop workflow automation for easy customization
- Agentic AI bots streamline problem-solving and processing
- Support for structured and unstructured data sources

Advanced Analytics and AI

- Transforms structured and unstructured data into insights
- No-code, low-code automation via drag-and-drop interface
- LLMs perform complex data transformations with simple prompts
- Support for private LLMs
- Natural language processing (NLP) for contextual insights

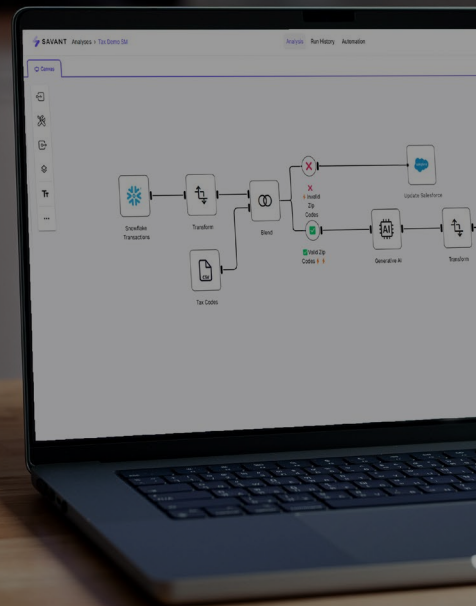

Enterprise Governance at Scale

- Centralized control over users, roles, and data
- Built-in monitoring, versioning, auditing, and auto-scaling
- User access management, data lineage, and data encryption
- Complete user activity history and audit logs
- Govern and collaborate in Workspaces

Seamless Integration and Connectors

- **500+** connectors for data sources and destination apps
- API integration with most leading CRM, ERP, BI, and cloud platforms
